PROJECTS

Below are some of the projects have done .I have done over 59 projects and you can refer to my github repositories by clicking the link [kimpetertanui.github.io](https://github.com/kimpetertanui) to find more projects

1. eApp

This is a lecturer evaluation android app a university uses to review and rate lecturer performance and effectiveness in a classroom .Ideally, the findings from these evaluation are used to provide feedbacks to lectures and guide their professional development.

2. RealEstate

This is an android app use by tenants to locate a rental house anywhere at any time.App's background is a map pulled from Google Maps API using current device location.App use JavaScript, JQuery ,PHP and CSS.

3. GlobeLink

An android app where users sell and buy their items online.App integrates M-PESA API payment,JavaScript ,android and PHP.

4. Limaris Technologies

5. OshaApp

For clients-Osha is convenient, inexpensive and safe washing service. Hire a private client to wash clothes for you with the tap of a button on any smart phone device. A nearby washer often arrives to wash within minutes. For those who wash, Osha provides exceptional pay, allows you to be your own boss, and even receive tips. To take on charges whenever you wish(work as much or as little as you desire) while meeting new people in your area from all walks of life!
